

Phase One V-grip Air

Phase One V-grip Air integrates Profoto Air wireless flash sync into the Phase One/Mamiya 645DF cameras. Thanks to the extremely short sync delay of Air it allows wireless flash sync with a shutter speed down to 1/1600 s!

AND MAMIYA

Profoto Studio Plug-in for Capture One Pro 6

Free Profoto Studio plug-in available for Capture One Pro 6. The plug-in integrates Profoto Studio 3 controls into Capture One Pro 6.

Flash trigger

Profoto Air Sync/Remote triggers ANY off-camera flash unit with a sync delay of only 200 μ s – faster than ANY other wireless flash sync system.

Camera Release

Profoto Air Sync/Remote in combination with Air camera release cables supports wireless release of one or more cameras from up to 300 m (1000 feet) away.

Profoto Air

One system –
endless possibilities

Remote control

Profoto Air Remote provides wireless remote control of Profoto flash units with built in Air – directly from your camera.

Virtual studio

With Profoto Studio 3 you can gain complete control of your studio setup from your MAC or PC. Set all your lights, save or recall favorite settings with just a click on the screen.
