Release notes
Pro-10 2400 AirTTL

Firmware version: B5

General notes

Pro-10 2400 AirTTL

The Pro-10 is designed to be "future proof" and the firmware can be upgraded via the USB port. Be sure to not miss important upgrades on your product. Register your Pro-10 on Profoto.com/register to receive first-hand information of future upgrades on your product.

This release note covers firmware specific information. Detailed functionality descriptions are found in the user guide.

New in firmware version B5

- Added HSS compatibility with Air Remote TTL-S version A3 (released 2017.02) and later versions.

Check firmware version

When the Pro-10 is switched off, press and hold the settings knob [1] and press the ON button [2]. Release the settings knob and then turn the knob to "Show revision" and press down to select. The installed firmware version is displayed in the center display.

Profoto Air Remote compatibility

The optional Profoto Air Remotes below are all tested with Pro-10 2400 AirTTL firmware version B5.

Profoto Air Remote options	TTL, HSS, Remote Control and sync	Remote Control and sync	Sync only
Air Remote TTL-C (For Canon)*	✓		
Air Remote TTL-N (For Nikon)**	✓		
Air Remote TTL-S (For Sony)***	✓		
Air Remote		✓	
Air Sync			✓

* For the full list of tested Canon camera models, check latest release note for Air Remote TTL-C.
** For the full list of tested Nikon camera models, check latest release note for Air Remote TTL-N.
*** For the full list of tested Sony camera models, check latest release note for Air Remote TTL-S.

Air Remote and Air Sync works with all cameras that have a hotshoe with ISO sync connection.
